Subject: Front End Web Developer opening

Dear Mr. Ravi,

I'm Jayaramani Jayasamy, an enthusiastic and aspiring web developer with a keen interest in creating exceptional digital experiences.With a keyboard as my paintbrush and the web as my canvas, I specialize in creating digital masterpieces.I make websites not only look good but also behave well.I thrive on turning those "404 Not Found" pages into "Welcome to Awesomeville" experiences.

My background in software testing at TCS has equipped me with essential skills such as attention to detail, problem-solving, and a deep understanding of the software development process. During my time at TCS, I honed my ability to ensure the quality and reliability of software products. Now, I am actively building on this foundation by pursuing web development skills, including proficiency in HTML, CSS, JavaScript, and relevant frameworks.

What excites me about the prospect of joining here is the opportunity to merge my experience in testing with my passion for web development. This unique combination allows me to approach web development with a keen eye for quality, ensuring that the end product is not only functional but also user-friendly and bug-free.

Additionally, I have experience in developing custom WordPress themes and plugins to meet specific client requirements.Below is my work sample using Wordpress

https://jayaramani03894.wordpress.com/2023/11/01/exploring-the-rich-cultural-history-of-india/

I welcome the opportunity to discuss how my skill set and background can make benefit and how I can contribute to your web development projects. Thank you for considering my application.

Best regards,
Jayaramani J
